

A CLIMATE CHANGE COMPANION

For family, school and community

New

David Hicks

eBook

Teaching4abetterworld

This book is a timely and practical response to the greatest challenge of our times – climate change. Intended for the general reader, concerned citizen and those with responsibility for young people, it provides a clear picture of what a more sustainable low-carbon future could look like and why this will be of benefit to present and future generations. It also sets out clearly key choices we need to make for our families and in our communities.

'This is a wise and practical book for everyone, which brings wisdom, humanity and hope where it is easy to be despairing and confused. We should be profoundly grateful for this radical and grounded book' - Steve Thorp, counsellor

Part One – Changing the climate

1. What do we need to know?
2. What's energy got to do with it?
3. What's the choice of futures?

Part Two – Telling new stories

4. The old story: high-carbon
5. The new story: low-carbon
6. Feeling the way forward

Part Three – Working for change

7. Getting things done
8. Adapting to climate change
9. Limiting climate change

Part Four – A journey of hope

10. Telling family stories
11. Learning about sustainability
12. Creating low-carbon community
